Customer_ID	VARCHAR(20)
Start_Date	DATE
Expiry_Date	DATE

Decimal(3,2) in Games.rating because some rating systems go up to 100

VARCHAR(40) in Employees.Name because some I dont know if the store wants the fullname

DATETIME in Purchase.date because some purchases have refunds on a 24hrs slot

Loyalty.Start_Date wasnt in the queries but Im assuming if there is an end there has to be a start

```
